## B BAR ANGUS

Welcome to the Lund's B Bar Angus annual production sale! We first want to give thanks to God for giving us another wet year that allowed His creation to flourish, and that all our family members stayed healthy! Is it not good to remember that God is in control, and He is for you not against you? Maybe only on the B Bar do cattle die and storms hit, but God is there to see you through. The biggest blessing for the B Bar is the birth of Emery Grace Lund this January. Great job Angus and Briley!

Our motto has not waived, **Seek the Balance!** In this day it seems as though the numbers (EPDs) are outperforming the cattle. The newer the generation, the higher the EPD. In 2007 the weaning EPD average was 39 and yearling was 69. On the American Angus Association website for 2022, we are now at a weaning EPD of 66 and 116 for yearling. Next for 2007 to 2022 comparisons, we see weaning weights go from 643 to 654 for bulls and 584 to 591 for heifers. So, let's use the bulls, since they increased the most, 11 pounds actual weight according to AAA website versus the EPD moving 30 points. How about the yearling weight? Maybe that is closer. 1136 in 2007 and 1136 in 2022. What? The EPD went from 69 to 116? This reminds us of advertising we see on the television. Everything is "New and Improved". We will let you decipher what is going on. For us, we will leave the EPDs out of our breeding decisions and breed for BALANCE for our environment.

The bulls were once again bucket fed here at the ranch. The maximum amount of grain was 9.8 pounds per animal. With the warm winter there were several feedings we cut back on their grain as we could tell their appetite was suppressed. The ration was two-thirds oats and one-third corn. The CHS pellet we added for protein and minerals was less than 1% of total weight per grinding. (Thank you, Heather).

Videos should be out the first part of March. DVAuction is again who we are using. (Thank you, Jay). We are not ultra-sounding this year as the bulls have all been Genomic tested (HD50K). Yearling weights will be on our website and DVAuction as a supplemental sheet. Scrotal measurements will be taken at semen testing which is scheduled for March 13th.

Thank you for your interest and support. Visitors are always welcome!

Hope to see you on sale day!

This bull has done an excellent job for us. He provides more muscle than his sire, and has a very quiet demeanor. Udder structure is solid. He is an old pedigree by today's standards, so his weaning and yearling EPDs are low. This year he will be nine years of age and is gaining traction across the USA. We still feel he is the perfect bull for our environment. These sons are again my favorite sire group.

This bull was so different from our program we had to keep him back and try him. Super impressive bone, good muscle, long bodied. If you want to put some bone back in your cattle after the spread bull era, these sons will do it! We will have one more calf crop from him this year is all as we lost him to a back injury.

We purchased this Stunner son from Arntzen's in 2022. His dam was in excellent shape with good feet still at the age of 13. The sons have good length and frame to them.

**B** Sitz Pride 200B • Paternal Granddam of Sitz Resilient 10208

This bull has good phenotype and great numbers. He does have a low docility score, but we have found if you do not change their routine, and if you allow them space and time to a new routine, they are fine to get along with. It is only a low percentage that we have had any issues with. This bull breeds very true and has worked in many programs across the nation. Udder structure is solid.

This bull was retained as our heifer bull in the 2021 sale. He was an excellent heifer bull for calving ease. His clean shoulders and body length was perfect for his job. This set of calves out of both heifers and mature cows. When we had injured bulls in our multi-bull pasture, he was pulled from the heifers and put out to help clean up our AI cows. His momma is a beautiful cow.
